TITLE Fact Book 1985: University of Hawaii Community Colleges.
INSTITUTION Hawaii Univ., Honolulu. Office of the Chancellor for Community Colleges.
PUB DATE [86]
NOTE 61p.
PUB TYPE Statistical Data (110) -- Reports - Descriptive (141)

EDRS PRICE MF01/PC03 Plus Postage.
DESCRIPTORS *College Faculty; College Programs; College Role; *Community Colleges; Degrees (Academic); *Educational Finance; Educational Objectives; Enrollment; *Enrollment Trends; State Surveys; Student Characteristics; Teacher Characteristics; Two Year Colleges; *Two Year College Students
IDENTIFIERS *Hawaii

ABSTRACT

Descriptive and statistical information is presented for the University of Hawaii's (UH's) community colleges and Employment Training Office. The first sections of the fact book examine the mission of Hawaii's community colleges and their administrative organization. Next, an overview is presented of the community college system, providing brief profiles of students, faculty, student services, continuing education, and other services and programs. A series of figures and graphs is presented next, covering: (1) undergraduate enrollment by University of Hawaii unit; (2) lower division enrollment in Arts and Sciences/General and Pre-professional programs by UH unit; (3) total community college enrollment by program area; (4) community college system general funds allocation, fiscal year 1984-85; (5) programs offered by campus; (6) enrollment by degree status; (7) degrees awarded, 1983-84 academic year; (8) selected student characteristics (i.e., full-/part-time attendance status, ethnic background, and gender); and (9) selected faculty characteristics (i.e., instructional area, highest degree, full-/part-time status, and tenure status). The final section of the fact book provides a brief description of each campus, along with program enrollment, general funds allocation, and student and faculty characteristics data. (EJV)

The Mission of Hawaii's Community Colleges

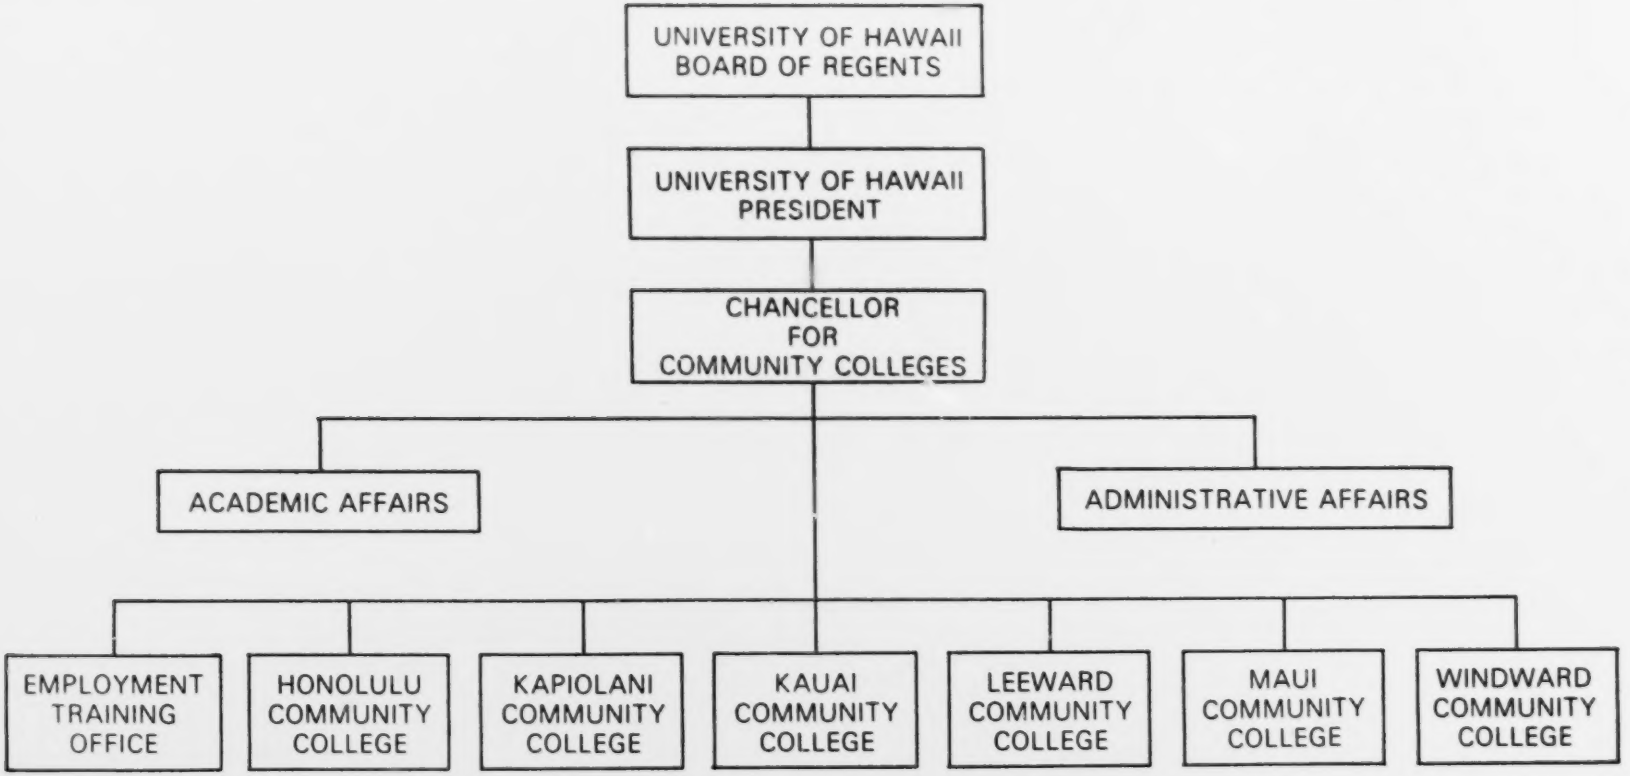
The Community Colleges of the University of Hawaii are committed to the mission of the total University:

"To provide all qualified people in Hawaii an equal opportunity for quality college and university education; to create knowledge and gain insight through research and scholarship; to preserve and contribute to the artistic and cultural heritage of the community; and to provide other public service through the dissemination of current and new ideas and techniques. In pursuing its charter, the University of Hawaii is committed to the development of the State's greatest asset, its people."

The mission of the Community Colleges also is consistent with the goals established by the State Postsecondary Education Commission and by the State Board for Vocational Education. Within this context, the Community Colleges of the University of Hawaii have as their special mission:

- To broaden access to higher education in the State of Hawaii by providing open door opportunities for students to enter quality educational programs within their community.
- To provide vocational and technical programs which both prepare students for immediate employment and provide the paraprofessional and trained work force needed by the State.
- To specialize in the effective teaching of general education and other lower-division liberal arts and pre-professional courses to prepare students to advance toward baccalaureate degrees.
- To provide opportunities for personal enrichment, occupational upgrading and career mobility through credit and non-credit courses and activities.
- To contribute to and stimulate the cultural and intellectual life of the community by providing a forum for the discussion of ideas; by providing leadership, knowledge, problem-solving skills, and general informational services in which the Colleges have special competence; and by providing an opportunity for community members to develop their creativity and appreciate the creative endeavors of others.

Organization of Hawaii's Community Colleges



An Overview of Hawaii's Community College System

The University of Hawaii Community Colleges include six community colleges (Honolulu, Kapiolani, Kauai, Leeward, Maui, Windward) and the Employment Training Office. Each Provost of these Colleges reports to the Chancellor for Community Colleges, who in turn reports to the President and the Board of Regents of the University of Hawaii. Within the University of Hawaii at Hilo is Hawaii Community College, whose Provost reports to the Chancellor of the University of Hawaii at Hilo.

Each community college offers a two-year Associate in Arts degree which prepares students to transfer to a baccalaureate-offering college, and a number of two-year Associate in Science degrees and short-term certificates in a wide variety of vocational/technical fields. The Community Colleges strive to offer a well-balanced array of educational programs and courses in response to differing community needs and available resources.

The Community Colleges have as a mission making quality education accessible to adults throughout the State of Hawaii. As a result of our policy of "open admission," any person with a high school diploma or equivalent, or who is 18 years of age or older, may attend a community college in the University of Hawaii system. This policy provides maximum educational opportunities to the residents of Hawaii.

Student Profile

The Community Colleges enroll more than 20,000 regular credit students and nearly 10,000 special students during a typical semester. The average student age is 25 years; over half of the students attend school part time, with many working full time while attending classes.

Women account for slightly more than half of the total enrollment, and the ethnic diversity of the Colleges reflects that of the community they serve. Students "stop-in" and "stop-out" of the Community Colleges' classes and programs, thereby making life-long learning an integral part of their life pattern.

Faculty

The faculty of the Community Colleges provide quality education to meet the special needs of the community college students in Hawaii. The faculty is composed of individuals who have excellent academic backgrounds, as well as vocational and technical expertise and experience.

Because instruction is the primary mission of the Community Colleges, the faculty are adept at matching teaching styles to the student and situation. By effectively blending traditional and non-traditional academic/educational skills, the community college faculty effectively serve the diverse needs of the many students who enroll.

In addition to the regular instructional services available at the campuses, the following services are also available:

Student Services

The Colleges offer counseling, advising, diagnostic testing, job placement, financial aid, student organizations and activities, and other specialized services for students.

Continuing Education

There are life-long learning opportunities, including general education, basic skills, vocational training, and other specialized short-term courses and workshops.

Other Community Services and Programs

Cultural and social learning opportunities, such as courses, workshops, personal interest seminars, and artistic performances, improve the quality of life for the individual.

Degrees and Certificates Awarded by the Community Colleges

Associate in Arts

An Associate in Arts is a liberal arts degree granted to students who successfully complete a two-year program of courses designed to transfer toward a baccalaureate degree.

Associate in Science

An Associate in Science is a degree granted to students who successfully complete a two-year program of vocational-technical courses and related general education courses. The purpose of the Associate in Science program is to prepare students for transfer to baccalaureate programs in applied fields.

Certificates

Certificates are awarded to students who complete a program of vocational-technical courses leading to entry-level employment or job upgrading skills.

The Campuses

Honolulu Community College

Honolulu Community College is a modern, urban campus with the warm personal touch of an island college located only a mile from downtown Honolulu. The College offers a strong liberal arts program in addition to the largest number of vocational/technical offerings in Hawaii, including programs such as commercial baking, cosmetology, refrigeration and air conditioning, and aviation maintenance that are not offered at any other campus.

There are approximately 4,550 regular credit students who come from throughout the State and the Pacific Basin area. An additional 3,000 are enrolled in non-credit or special courses and programs.

Honolulu Community College has cooperative education programs in 25 fields ranging from welding and carpentry to biomedical electronics and occupational safety. Students can get practical experience as part of their course work on campus in places like the campus bake shop, the auto repair and painting shop, the cosmetology clinic, and the campus media center.

Kapiolani Community College

Kapiolani Community College provides general higher education opportunities to the East Honolulu area, while also serving a statewide need for selected vocational programs. The College offers unique statewide programs in six allied health fields and in legal assisting. In addition, the College offers an excellent liberal arts transfer program and vocational training in accounting, data processing, secretarial science, food service, hotel operations, and nursing.

In addition to its regular credit program, Kapiolani also offers an outstanding array of non-credit courses to Honolulu businesses, senior citizens, and others in the community. Computer skills courses offered in a microcomputer lab at the Diamond Head campus are among the most popular of the school's non-credit offerings.

Students currently attend classes at one of two campus locations—Pensacola, a small five-acre site near downtown Honolulu, and Diamond Head, a spacious tree-shaded site on the slopes of Diamond Head. Student enrollment in Fall 1984 was nearly 5,300 students, with more than 2,000 of these students attending at least one class at the Diamond Head campus.

The move of all college programs and services from Pensacola to new facilities at the Diamond Head campus is being carried out incrementally during the decade of the '80s. New classroom buildings have already been completed for health education, general science, and music, drama, and dance.

Additional buildings under construction will house business and fine arts, as well as a campus computing center and learning assistance center. A campus center and administration building are also in the design stage.

Kauai Community College

Kauai Community College occupies a beautiful 99-acre campus at Puhi, near Lihue. The atmosphere is quiet and conducive to learning. A campus center and a learning resources center are hubs of the campus, with surrounding buildings devoted to the fine arts, trade-technology, natural and social sciences, business education, and nursing.

Student population is 1,160. Students say the smallness of the island allows them to use all of Kauai as a campus. Classes make frequent trips to nearby beaches, historical sites and botanical gardens, and business and government leaders participate in the classroom process.

Programs help fill the need for trained employees on Kauai, in such critical fields as health care. Other strong programs include liberal arts, automotive mechanics, auto body repair, welding, carpentry, and business education, which includes accounting, clerical and secretarial, management, and visitor industry programs.

Leeward Community College

Leeward Community College, located between Pearl City and Waipahu, enrolls 5,750 students in vocational programs and liberal arts courses covering some 50 different subject fields. Classes are offered during the day and evenings on campus, and off campus at an education center in Waianae-Nanakuli and on selected military installations on Oahu.

Leeward Community College has well-equipped classrooms, labs and shops, an extensive library collection, a campus center, and a theater. Special services are available for handicapped and disabled students. Leeward CC also maintains an excellent career advising program to help individuals establish life, career, and educational goals. Remedial and developmental programs are offered in basic learning skills.

A broad-ranging community services program of non-credit classes, workshops, forums, and cultural activities including music, drama, and dance performances is also available.

Maui Community College

Maui Community College, between Wailuku and Kahului, occupies an open, spacious campus between the ocean and the West Maui Mountains. Stylized "Hawaiian hut" classrooms and offices are complemented by the modern library, the foreign language and science buildings, and the student center. Enrollment is 2,000, small enough to permit close personal interchange between students and faculty.

Special programs of note are those in food service and hotel operations, both pertinent to Maui's economic needs; a nursing career ladder program; and technology programs in agriculture, automotive, carpentry, and apparel design.

Maui Community College also offers credit and non-credit programs and courses on the islands of Molokai and Lanai, and to the remote communities of Lahaina and Hana on the island of Maui, making MCC the only tri-isle campus in the University system.

To meet the needs of its diverse clientele, MCC has taken the leadership in offering individualized competency based courses and televised instruction.

Windward Community College

Windward Community College primarily serves residents from Kahuku to Waimanalo with liberal arts courses and programs in accounting, finance, secretarial science, automotive mechanics, and agriculture.

About 1,400 students attend classes in one of the most beautiful settings in Hawaii. Located at the base of the Koolau mountains above Kaneohe town, the College occupies rambling buildings set among coconut palm, mango, and banyan trees.

Plans are being developed for new facilities on the campus to meet the needs of future generations of students.

Employment Training Office

Training You Today for Tomorrow's Jobs

The Employment Training Office offers job-training programs throughout the State of Hawaii. Its programs are unique in that they are not provided through a campus in the traditional sense nor at any permanent facilities. Training is conducted where there is a specific need.

At the present time, the Employment Training Office offers training in clerical skills (Honolulu, Waianae, and Maui); food preparation and baking (Honolulu and Maui); auto mechanics and auto body and painting (Honolulu); building and grounds maintenance and emergency medical services (Honolulu, Maui, Kauai, Hawaii), as well as specialized education programs for military personnel (Schofield Barracks and Fort Shafter).

Over the past year more than 6,000 students received short-term concentrated training for jobs through Employment Training Office administered programs. Many are attracted by the flexibility of year-round, individualized, open-entry/exit programs which characterize the Employment Training Office style of operation.
